

Update your Visitor's Internet Access

ConferenceHub™

4-Port Conference Room Networking Switch

TeleAdapt's ConferenceHub™ is a multi-port networking switch that provides four 10/100Mbps Ethernet ports with fully retractable LAN cables. The ConferenceHub™ was designed for easy installation and high-performance in a conference room environment where users need to access the network, but don't want the hassle of cord clutter. The unit can sit on top of a conference table providing easy and quick access via its patented ThinLine™ flat retractable LAN cables for multiple users.

This stylish unit will enhance the look of any conference or meeting room and increase your meeting productivity. The easy-to-read status lights let users know the Ethernet network is on-line and available for use. The ConferenceHub™ is part of the TeleAdapt DeskHub® product range of High-Speed Internet Access connection points designed to address the user's need to connect their laptops and portable electronic devices without having to pack extra cables and adapters.

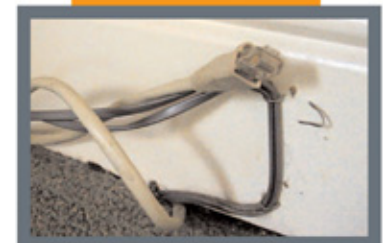

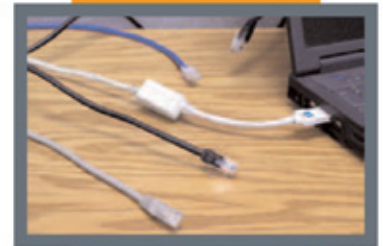

Features and Benefits

- Four 5 feet retractable 10/100Base CAT6 LAN cords with RJ45 connectors
- Auto-learning of networking configurations
- Auto-detect of full/half-duplex modes in all ports
- Daisy chain multiple units for more access points
- Dedicated full-duplex 200Mbps bandwidth on each port
- Store and forward switching methods
- IEEE 802.3x flow control for full-duplex communication
- Plug-and-play connections in all network environments

TeleAdapt's DeskHub® Line

The TeleAdapt DeskHub® product line consists of wired and wireless solutions, making connecting to existing network infrastructure straightforward and trouble-free. The DeskHub® line was created to provide recognizable connection points for HSIA, provide powerful branding opportunities, streamline cabling requirements and leave a lasting impression with each visitor.
