

# Increase Your Venue's HotSpot Revenue

## DeskBridge™

### Ethernet Guest Connection Point for Wi-Fi Locations

The DeskBridge™ is the only wireless to wired network connection point designed specifically for hospitality and public Wi-Fi HotSpot markets. Offering a wired connection to your wireless network, the DeskBridge™ creates an attractive and effective guest access point which immediately increases the number of potential users of your HotSpot. The DeskBridge™ is designed with hotel and resort property aesthetics and end-user simplicity in mind. It is the perfect solution for hotel, resort and restaurant owners who want to fully maximize their wireless investment.

The placement of the DeskBridge™ in your HotSpot or a hotel room adds versatility to your network connectivity options, and also helps advertise the presence of your property's Wi-Fi service.

Create wired connection points to your existing Wi-Fi network by placing a DeskBridge™ in the lobby, lounge, coffee shop, pool area, conference center or a guest room. Increase wireless network usage by making it available to customers who don't have a Wi-Fi enabled laptop or mobile computing device.

Place a DeskBridge™ anywhere inside your property's wireless network footprint to provide access for those without Wi-Fi compatible laptops. Customers simply connect the unit's integrated retractable CAT5 cable to their laptop's Ethernet port without installing drivers or altering their network settings.

#### Features and Benefits

- Provides retractable RJ45 Ethernet access in Wi-Fi only locations
- Advertises your HotSpot presence - increases your daily Wi-Fi revenues
- No drivers required - Simple web based browser SSID network configuration
- Front logo space and rear card holder for your instruction card and advertising
- Metal mounting plate or adhesive double-stick pad options for added security

#### TeleAdapt's DeskHub® Line

The TeleAdapt DeskHub® product line consists of wired and wireless solutions, making connecting to existing network infrastructure straightforward and trouble-free. The DeskHub® line was created to provide recognizable connection points for HSIA, provide powerful branding opportunities, streamline cabling requirements and leave a lasting impression with each guest and customer.
