

Need a Simple Solution for Purchasing and Inventory Management? Get With It – Get HIP

“We are currently using HIP for the Engineering, Landscaping and Transportation Department and we are very happy with it. I love the functionality it provides and we are finding new uses for it everyday.”

Robin Shorter
Engineering Department
The Villas of Grand Cypress

Tracking the purchasing and inventory of spare parts and other items may not be sexy but it's a definite must for some hotels. HIP – Hotel Inventory and Procurement – provides a simple checkbook style accounting system for getting it done.

Manage Your Budget The Easy Way

Start by entering your budget in a few simple steps. As purchase orders are processed and inventory is used, HIP makes sure you always know how much is on hand, on order, and committed which means you'll always stay on budget.

Track Costs For Billing

And because HIP is part of the HotSOS family, any parts used on are automatically reduced from your inventory and the costs instantly appear on work and service orders to make billing your customers a snap. HIP even keeps track of your reorder points. It's like a mini-ERP designed around the way hotels work.

If you need an easy way to manage your budget and inventory then you need to get with it. Get HIP!

Call us today or visit www.m-tech.com to learn more about how HIP can help you control your inventory, manage your storerooms, and reduce costs.

The HIP Workflow

HotSOS dispatches service orders to popular wireless devices.

Staff takes part from inventory and adds to service order.

Staff closes service order and HotSOS captures all labor and parts costs instantly.

Management generates reports to track costs and create billing statements as needed.

BENEFITS

Integration With HotSOS-
Simplifies Billing

Saves Time, Paper,
And Money

Increases Accountability

Reduces Shrinkage

Simple To Setup And Use

FEATURES

Tracks Inventory Parts,
Costs, And Minimum
Reorder Points

Budget Vs.
Actual Tracking

Manages
Purchase Orders

Integrates With
HotSOS
