Nomadix Overview

- **Founded in 1998 - Nomadix focus is public Internet access market solutions.**
- **Global Market Leader**
 - ▣ 70,000+ NSE Installed in 60+ Countries
- **Wholly owned subsidiary of DoCoMo interTouch**
 - ▣ a provider of managed services for Hospitality industry.
 - ▣ Nomadix is organized as a Software company offering;
 - (NSE) Nomadix Software Engine.
 - Currently (3) Three gateway platforms powered by the Nomadix Software Engine for;
 - public Internet access networks,
 - visitor based networks and
 - metropolitan Wi-Fi Zones.
- **Office Locations**
 - ▣ Global Headquarters is Agoura Hills, California USA with additional offices in Europe and Asia.

New Product Launch – NITO

□ Nomadix Internet Traffic Optimizer – NITO [500/1500]

- *Deep Packet Inspection / Reporting / Bandwidth Control*
- 6 x Gigabit Ethernet Ports + Serial (RJ45) console port
- Stateful firewall based on “Smoothwall” open source firewall that can be configured between all ports
- Advanced web content filtering engine to block unwanted content.
- L7 packet inspection for P2P traffic suppression
- 800Mbps throughput
- Easy to use dashboard
- Advanced user activity logging and reporting functions
- Advanced traffic usage reporting functions
- User authentication against LDAP, AD, Radius and others

New Product Launch – NITO Features

- ❑ 6 x Gigabit Ethernet Ports + Serial (RJ45) console port
- ❑ Flexible DHCP server
- ❑ IM proxy server – content filtering of Instant Messaging
- ❑ Optional intrusion detection
- ❑ 1 + 1 High availability
- ❑ VPN concentrator for LAN to LAN or remote users
 - SSL, IPSEC , L2TP and PPTP
- ❑ Optional email anti spam and anti malware filters
- ❑ Web proxy server
- ❑ Transparent proxy server
- ❑ Web traffic filtering and anti malware
- ❑ Policy and time based usage quotas
- ❑ WAN load balancing
- ❑ WAN failover detection (ICMP ping based)
- ❑ Different administrative user rights

New Product Launch – AG5800

□ Nomadix AG5800

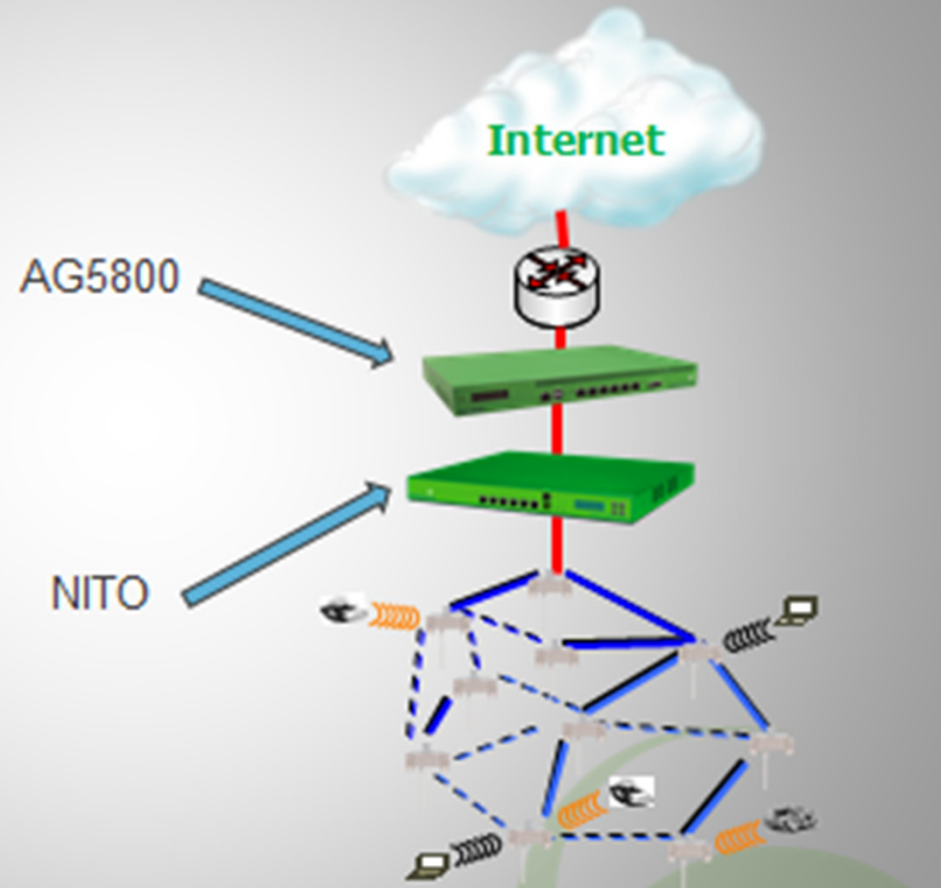

- Runs NSE 8.0 or above software
- 6 x Gigabit Ethernet ports
- Serial Console Port (RJ45)
- Serial PMS port (DB9)
- Full Gigabit throughput / High Performance
- NSE 8.0 ---- 5 x LAN, 1 X WAN configuration
- NSE 8.2 ----- Multiple WAN configuration with WAN load balancing and failover capability
- Scalable User licenses of 250, 500, 1000, 1500, 2000 , 3000 4000 users
- Based on Intel ‘SandyBridge’ I3 processor

New Product Launch – NITO/AG5800

□ Powerful Combination – NITO + Nomadix

Combining a Nomadix gateway, such as the AG5800, with the NITO allows for application based tiered offering. A Combined application and bandwidth tiered offering creates a compelling upsell opportunity for the hotel.

INTERNATIONAL

New Product Launch – Wireless GW

□ Wireless Connect Gateway

- Replacement for AG2100 wireless gateway
- Integrated Gateway and onboard Wireless Access Point
- 1 x WAN port and 4 x LAN port (10/100 Mps)
- LAN port can support wired connections or additional 3rd party wireless AP to extend wireless coverage
- On board 2.4GHz 802.11 b/g/n (2T+3R) wireless radio
- Gateway supports up to 200 concurrent users
- Internal or external captive portal
- Internal or external (radius based) user authentication

Nomadix NSE software

- Release timelines for new NSE software
- NSE 8.X uses latest VxWorks RTOS
- NSE 7.4 will be maintained until Dec 2012

Nomadix Datasheets

AG2300

HIGH CAPABILITIES, SIMPLIFIED ACCESS FOR SOHOS

Nomadix AG2300 Access Gateway

The Nomadix AG2300 brings high end features of Nomadix renowned intelligent public access to SOHOs desiring to offer High Speed Internet Access (HSIA) as a value added service to their customers.

Based on the same leading Nomadix Service Engine™ (NSE) Core Software, its price per performance is of high value for venues requiring up to 50 simultaneous connections.

NOMADIX PATENTED TRUE PLUG AND PLAY FOR SUPERIOR CUSTOMER EXPERIENCE

Browser and device agnostic, the AG2300 ensures access for all user devices, be it Smartphones, Netbooks, iPads or laptops. Simplified connectivity with zero configuration required reduces the need for technical support and provisioning costs by business owners. Nomadix patented Dynamic Address Translation™ (DAT) technology and dynamic transparent proxy technologies gets users connected to the Internet easily and fast.

ENHANCED FEATURES, MAXIMIZE BRANDING

The suite of features built into the AG2300 includes delivery of local content, bandwidth management, maximization of revenue beyond connectivity charges – all designed and selected to help SOHO business operators obtain optimal value. With Nomadix patented Home Page Redirection, business owners reinforce their business brand every time a user logs onto the Internet.

- Dynamic Address Translation™ (DAT)
- Dynamic Transparent Proxy

- Bandwidth management
- QoS Tagging
- International Language Support
- Home/Portal page redirection

AG3100

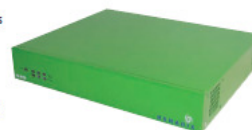

ESTABLISHED, DEDICATED PUBLIC ACCESS FOR SMBs

Nomadix AG3100 Access Gateway

The mid-range public access gateway solution provides options for SMEs which require higher simultaneous user connections of up to 200 users at an improved throughput.

Based on the same leading Nomadix Service Engine (NSE) Core Software, the AG3100 is a dedicated network appliance placed at the edge of the network, providing universal mobile connectivity, security and policy-based shaping for the subscriber.

FAST AUTHENTICATION AND SECURE ACCESS CONTROL

Supporting multiple authentication models allow users to connect to the Internet securely and quickly, and help business operators prevent unauthorized network access. With the Remember Me function, it stores encrypted login cookies to create better user experience for repeat visits.

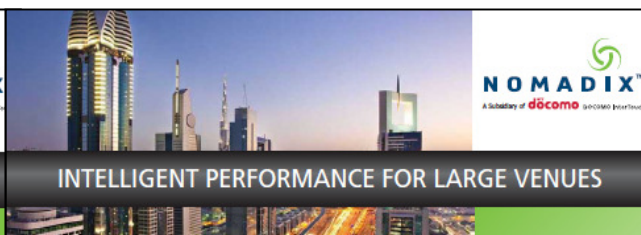

ENHANCED FEATURES, ADDITIONAL REVENUE STREAMS

The suite of features built into the AG3100 includes delivery of local content, bandwidth management, maximization of revenue beyond connectivity charges – all designed and selected to help SMB business operators obtain optimal value. With the walled garden feature, business operators are able to gain incremental revenues for e-commerce sites, applications, and advertisements before the user purchases access.

- TriMode authentication with IEEE 802.1x, UAM via SSL, and Smart Client
- Remember Me Log-in

- Bandwidth management
- Traffic shaping
- International Language Support
- Home/Portal page redirection
- Walled garden

AG5600

INTELLIGENT PERFORMANCE FOR LARGE VENUES

Nomadix AG5600 Access Gateway

The AG5600 is a high performance network appliance enabled with GigE throughput capability for deployment in large venues including hotels, airports, convention centers and municipal Hotzones.

Built upon the proven Nomadix Service Engine (NSE) Core Software, the AG5600 is a high end access gateway offering a full suite of intelligent and secure solutions for businesses needing to support thousands of simultaneous users.

SCALABILITY WITH GigE PERFORMANCE

As a high performance access gateway, the AG5600 comes with GigE throughput, advanced bandwidth management capability and offers a Metro Expansion Bundle which will allow the gateway to support up to 4,000 simultaneous users. The AG5600 is also a platform of choice for many third party application developers, your investment in the access gateway is future proofed.

INTELLIGENT ROAMING INNOVATION

With Nomadix intelligent Zone Migration, users no longer have to go through repetitive re-authentication process while roaming between hotspot zones within a network. On top of that, the AG5600 provides the added advantage for users to maintain one billing account with their service provider while roaming between networks.

- Metro Expansion Bundle
- Hospitality Module
- GigE throughput

- Zone Migration
- Realm Based Routing

Nomadix Network - Plug and Play

- **Patented Dynamic Address Translation™**
 - ▣ No re-configuration of Client system Required
- **Proxy Support**
 - ▣ Support for HTTP and HTTPS browser proxy settings
- **DHCP Support**
 - ▣ Server and Relay Support conforming to RFC's
- **Patented iNAT™**
 - ▣ VPN, IPSec, PPTP support without requiring a large list of public addresses
- **SMTP redirect**
 - ▣ Redirect outbound mail for client even if server is unreachable

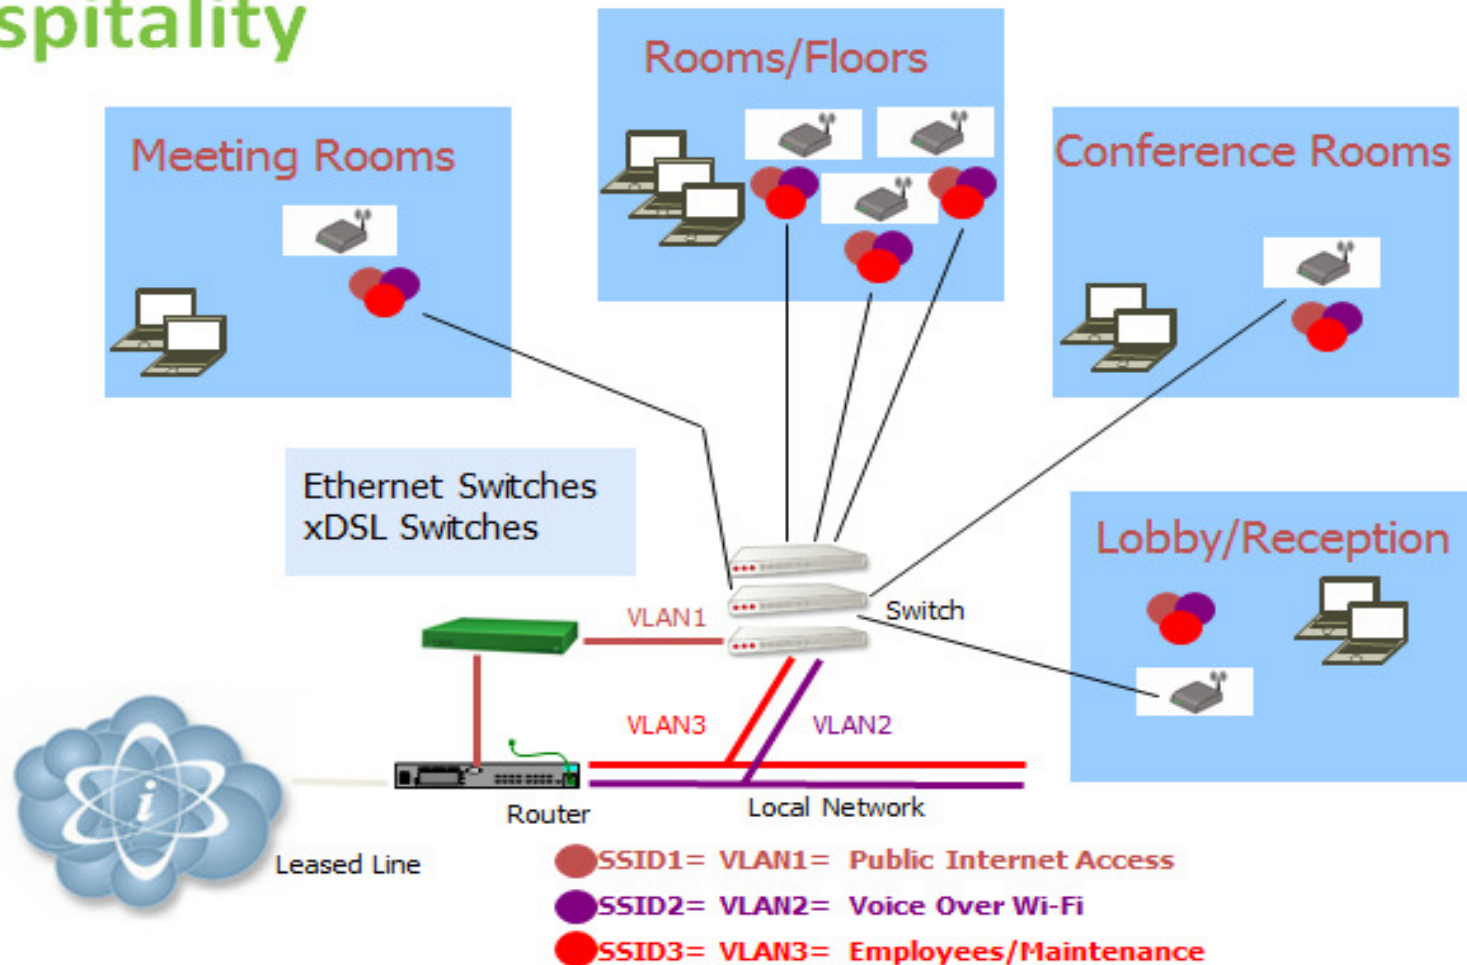

Nomadix - Key Functions & Features

- **Internal Basic Web Portal**
 - ▣ Default login page with basic modifications available
- **Portal Redirection**
 - ▣ Redirection to an external server for complete Branded experience
 - Freedom Internet – explained later in this presentation.
 - ▣ Parameters sent to the Portal can be used for Location aware branding
- **Universal Access Method (UAM)**
 - ▣ Support for Standard Browser login
 - ▣ Simultaneous Support for UAM, 802.1x, and Smart Client
- **XML support**
 - ▣ XML API can be utilized by the Portal to control Subscriber Authentication on the NSE
- **Smart Client Support**
 - ▣ Support GIS standard clients & IPASS, Boingo, GRIC

- ❑ Hotel Branding and Advertising for Hotel Restaurants and Facilities
- ❑ Wired and/or Wireless
- ❑ New Guests/Existing Guests via HSM and Group Accounts for Conferences
- ❑ Billing to PMS via 'Query and Post'
- ❑ Weather Widgit

The screenshot displays the InterContinental Sydney website interface. At the top, the hotel's logo and name are visible. Below this, there are several sections:

- InterContinental Internet Access:** A section with three buttons: "New Guest", "Existing Guest", and "Group Account". Each button has a corresponding question and instruction for the user.
- Meetings and Events:** A section featuring a photo of a meeting room and text describing the hotel's 15 meeting rooms and their amenities.
- Club InterContinental:** A section with a photo of the Sydney Opera House and text describing the hotel's rooftop lounge and its location on the 31st floor.
- Dining at InterContinental Sydney:** A section with two sub-sections: "New Cafe Opera" and "The Cortile lounge", each with a photo and descriptive text.
- Weather:** A section featuring an AccuWeather.com widget showing the current weather in Sydney, Australia, and a map of Australia.

At the bottom of the page, there is a row of logos for various hotel brands: InterContinental Hotels & Resorts, Crowne Plaza Hotels & Resorts, hotel Indigo, Holiday Inn, Staybridge Suites, and Candlewood Suites.

Network and System Interconnectivity

Teleadapt Connectivity Solutions

Technology is an important part of our daily lives. Today's guest travels armed with a multitude of devices that require Internet and media connectivity and available power outlets for recharging.

TeleAdapt focuses on how guests connect to the guestroom, and delivers unique products designed to improve the guest experience. Working closely with consumer technology manufacturers and hoteliers, we are able to provide user-friendly connectivity solutions that are aesthetically pleasing and enhance the guestroom technology amenity.

The Pull-Through Series

If you're looking for Internet access points or TV hook-ups to stream audio and video, we have the perfect solution. You can choose your base and cap color and brand each unit with your property's logo.

DeskPoint TA-6900

When you're wired for high-speed Internet but your guests are demanding wireless... Works right out of the box, just plug it in...
