McLaren HotSpot Manager Software

The McLaren Hotspot Manager [HSM-WEB] integrates with ALL Nomadix Gateways to provide instant Profile creation and Management. Accessible via any Web Browser, the profiles contain a username, secure password and a range of user and property defined features. Once created the HSM-WEB adds these profiles in real-time to the Nomadix database. Confirmation slips are printed and also made available via Email and SMS [optional].

◻ Unlimited Web Clients

◻ Individual and Group Account creation. Pre-defined and random profiles

◻ Pre-defined packages for standard and X/Y plans

◻ Plans – Per time unit / IP Type / Bandwidth UP and DOWN

◻ Billing to PMS Room Folios

◻ Previous days posting report scheduled for sending to email accounts

◻ Scheduled purging procedure for Nomadix profiles

◻ View current live users on Nomadix

◻ High Availability support for Nomadix
