Customer Support Request

McLaren Technologies is committed to helping you generate higher revenues, reduce operating costs and increase customer satisfaction and engagement. In short, our goal is to help you achieve your goals. To do so, we are working closely with Intelity Corp to ensure all Support services are streamlined, making it more efficient.

Exceptional Availability

Our goal is to provide a 99.9% application up time over the span of the agreement excluding predetermined maintenance windows, as well as network and other potential outages outside of the control of McLaren/Intelity.

Data Security

McLaren/Intelity will employ security methods and procedures in accordance with current company privacy policies, as well as industry best-practice standards. As standard practice, all ICE tablets will have restrictions enabled to the extent provided by the hardware and OS platforms to prevent guests from accessing device configuration settings.

Alerts and Advance Notifications

McLaren/Intelity will make every reasonable effort to provide advance communication regarding scheduled server maintenance or security changes that may affect usability of the ICE system. McLaren will provide communication regarding all system updates and reserves the right to determine criteria indicating the need for any application update/upgrade and its implementation.

ICE customers are expected to report any planned changes/modifications to their internal systems or the local environment that may affect the functionality of any installed McLaren/Intelity systems notification to be received at least 1 week in advance of such changes. This includes, but is not limited to, any hotel system upgrades, internal network or Internet service changes or routine maintenance. Notification of such changes less than one week in advance may result in additional support charges to the Client depending upon the remediation work required on McLaren/Intelity's side to restore ICE services.

Customer Support Information

Support can be requested via Phone, Email or Online Help Portal. Case Reference numbers are used to track and monitor the Support Request.
