IDEM
HOSPITALITY

AI ENABLED SOFTWARE TO AUTOMATE THE MANAGEMENT OF GROUPS

We believe that great events profoundly & positively impact the world.

Which is why it is our goal to simplify bringing people together! We are achieving our goal by providing a truly end-to-end event housing solution for Meeting & Event Planners, from online group guest reservations, to detailed reporting giving Planners what they need, when they need it. Whether it is a simple meeting bringing 100 industry professionals together, or a citywide event across multiple hotels for thousands of guests to attend a global association conference, Idem's powerful and secure event housing software will save you time and help generate more profitable events.

WEB & MOBILE GROUP BOOKING

Customized guest reservations websites for every group allow your guests to process their reservations online within the contracted block at your negotiated rates. Whether by mobile, tablet or website, it's faster, easier and improves the guests experience.

SECURE ROOMING LISTS

Artificial Intelligence enabled Rooming List import uploads your list in less time, with less risk, at a much lower cost per reservation than with manual processes. Your rooming lists are transferred securely to the hotel, not over the public internet.

CITYWIDE EVENTS

Large Events are our specialty! IDEM provides one-stop online booking of rooms across one or many hotels, no matter the size of the event. Easily create multiple attendee types with their individual reservation links, VIP's, and Delegates.

INCREASED BLOCK PICKUP & COMMISSION

By providing a personalised event booking website you'll enjoy greater pickup inside the group block because all hotel information is easily accessible in one place. Your attendees are less likely to book around your block and search for other options. Moreover, track real time performance and post event reports to assess the true value of your commissions.
