

NOMADIX CLOUD[®]

Managed Wi-Fi

Carrier-grade Wi-Fi for Residential and Enterprise Networks

Subscriber and Bandwidth Management for MDUs and commercial buildings enables:

- Seamless Property-wide Wi-Fi
(Ethernet ports optional)
- Secure Personal Area Network for each subscriber
- Mobile Virtual Networks / MVNO

**Apartments &
Condominiums**

**Student Housing &
Workers Dormitories**

**Assisted &
Senior Living**

**Shared Offices
Spaces**

Shopping Malls

Simple and intuitive Wi-Fi experience.

Simple. Secure. Smart.

Single SSID for reduced network complexity and ease of use

Personal Wi-Fi WPA2 keys for improved security for residents and tenants

Seamless connections anywhere on the property

Wired ports support for video streaming devices, connected speakers and IoT hubs

Bandwidth limits can be set per subscriber or per device

Easier to manage than most consumer-grade home Wi-Fi routers

New revenue stream with Wi-Fi as a service.

High Speed Plans

Nomadix Cloud allows you to offer choices to your subscribers, letting them choose the right bandwidth plan suitable for their household or business (up to 5 Gbps per subscriber).

Local Provisioning

Simple and intuitive portal for Property Managers to provision and support Wi-Fi access for their subscribers saves costly truck rolls associated with new customer acquisition.

Low Support Cost

70% of Managed Wi-Fi calls relate to device onboarding. With Nomadix Cloud, subscribers manage their own Wi-Fi settings and device onboarding using an intuitive web portal.

Simple to use Wi-Fi management portal for residents and subscribers.
