

KEENON MULTIFUNCTIONAL ROBOT - W3

Warm, smart, and efficient

Core Features

Worry-free
Delivery

More than a
Machine

Obstacle Avoidance

Self Charging

Application Scenarios

Company Profile

Keenon Robotics Co., Ltd. was founded in 2010 in Shanghai. We are a global leading AI company focusing on indoor intelligent service robots. Keenon is an expert in the field of indoor autonomous driving, providing intelligent unmanned delivery solutions for our customers. We have more than 10,000 customers and exported to 60+ countries, such as the USA, Canada, UK, Germany, Japan, and the UAE. Keenon robots are mainly applied in sectors of catering, hotel, hospitals, office, bank, and airport.

We have three factories in Shanghai, Jiaxing, and Suzhou in China.

Product Parameters

Product Size
450 * 550 * 1080 mm

Product Weight
48 kg

Number of Cabins
2 / 3 / 4 Cabins

Load Capacity
10 kg / layer

Minimum Pass Width
70 cm

Working Time
12 h

Charging time
4 h

System
Android

Product Display

In the era of AI and IOT

Our robots will bring you a new experience!

Full Autonomous Positioning and Navigation

The simultaneous localization and map (SLAM) building system is independently developed by Keenon Robotics, which makes our robots work Stably and efficiently.

And the newest binocular stereo vision obstacle avoidance is more accurate.
